WORK EXPERIENCE

SYSTEM DEVELOPER OJT	Science City of Muñoz, Nueva Ecija Feb 24 2025 - May 23 2025
Served as a System Developer at the Department of Information Technology, CLSU, Science City of Muñoz, Nueva Ecija, from February 24, 2025 to May 23, 2025. Responsibilities included developing a Moodle-based Learning Management System, assisting clerical activities, and handling front-end development tasks.	
FRONT DESK ASSISTANT Immersion	San Jose City, Nueva Ecija Nov 19 2019 - Feb 20 2020
Served as a Front Desk Assistant at City Health Office, San Jose City, from November 19, 2019 to February 20, 2020, responsible for compiling patient information, assisting patients with requests at the front desk, and accurately storing data.	
CANTEEN CASHIER Volunteer	San Jose City, Nueva Ecija Dec 17 2018 - Feb 9 2018

Worked as a Cashier at San Jose City National High School SHS, San Jose City, Nueva Ecija, from 2017 to 2018. Duties included assisting customers, compiling, copying, sorting, and filing records of the canteen's business transactions, as well as storing data accurately.

PROJECTS

Lead Developer | Loan Tracking & Management System

- **Architected** a financial tracking application using **Laravel** and **MySQL** to manage full loan lifecycles.
- **Designed** a responsive administrative dashboard using **AdminLTE** to improve data visualization and management.
- **Integrated SMS and Email APIs** to automate real-time notifications for loan approvals and payment reminders.
- **Implemented Data Portability** using Laravel Excel for seamless **Import/Export** of CSV/Excel reporting data.

System Developer (OJT) | Moodle Learning Management System (LMS)

- **Developed and configured** a Moodle-based LMS at the CLSU Department of Information Technology to enhance digital education delivery.
- **Managed front-end customization** and UI/UX improvements to ensure a user-centric learning environment.
- **Collaborated on back-end activities** and clerical technical support to maintain system stability.

Automation Developer | Telegram Order & CRM System *Make (Integromat)*

- **Architected** a bi-directional ecosystem using Make.com to sync form submissions with **Google Sheets**.
- **Engineered** a Telegram Bot interface for real-time status updates via **Callback Queries** and **Regex data** cleaning.
- **Automated** personalized customer outreach by integrating the **Gmail API** with real-time database changes.

AI Autonomous Gatekeeper | Lead Qualification System *GitHub Pages, OpenAI API, Zapier, JavaScript*

- Developed an end-to-end autonomous lead-scoring agent that filters incoming inquiries with **95% accuracy** based on custom intent parameters.
- Engineered a **multi-stage automation pipeline** using Zapier Webhooks to connect a static frontend with GPT-4o-mini for real-time natural language processing.
- Implemented **conditional logic branching** to route high-value leads to Google Calendar while shunting low-priority inquiries to a Telegram notification bot.
- Optimized the frontend with **Tailwind CSS** and asynchronous JS to provide a "soft refresh" user experience without page reloads.

TECH STACKS

- Languages/FrameWorks: PHP, Laravel, MySQL, Wordpress
- AI & Automation: Make (Integromat) Automation, Zapier Workflow Automation, Open AI Integration
- Data Handling: Advanced Excel, JSON

- Tools & Platforms: GitHub, Moodle LMS Customization, Webhooks, Google Workspace API
- Microsoft Office Tools: MS Word, Excel, PowerPoint, ClipChamp

CERTIFICATE

- SAP Analytics Certificate
- AWS Cloud Practitioner Certificate
